## Module 6 Quiz: Context Variables & Slots

LATEST SUBMISSION GRADE

100%

1. Once set, context variables can be accessed for the duration of the conversation with a given user.

1 / 1 point

- ☒ True  
☐ False

✓ **Correct**  
That's right.

2. Slots allow us to collect information from the user and store it in context variables.

1 / 1 point

- ☒ True  
☐ False

✓ **Correct**  
Correct.

3. Slots with no question defined are optional and will only set the context variable if the condition (e.g., @location) is detected.

1 / 1 point

- ☒ True  
☐ False

✓ **Correct**  
Yes. Quite handy.

4. A node can only have one slot and therefore cannot assign more than one context variable.

1 / 1 point

- ☐ True  
☒ False

✓ **Correct**  
That's right.

5. In general, a required slot will only ask its question to the user once, even if the user replies with irrelevant information.

1 / 1 point

- ☐ True  
☒ False

✓ **Correct**  
That's right. By default, required slots don't give up asking their question until the user provides an acceptable answer.
